Unique Job Grant

What is it?

The Unique Job Grant (*Dote Unica Lavoro*) accompanies a person through the different steps of the professional life thanks to integrated and customized services.

The person can benefit from professional and training services, in line with job-related needs.

Five categories of support have been identified and evaluated according to: distance to the labor market, age and gender.

To activate the Job Grant, it's necessary to check with a Lombardy Region approved operator in order to carry out the user profiling process and to determine the proper category.

Each category is associated to a specific Job Grant: the economic value and services are established according to the support level.

By activating the Job Grant, a Personalized intervention Plan (*PIP*) is defined in order to meet one of the following aims:

- **Working integration;**
- **Self-employment and self-entrepreneurship;**

- **Retraining (only for Category n. 5).**

Provided services are free-of-charge.
